

TECHNICAL TRAINING - AIDS TO NAVIGATION

Training Code SL-S-TRAINING-TECH-ATON

Overview

Sealite's Technical Training is designed to provide interested persons with a full understanding of Aids to Navigation (AtoNs) to enhance safety of their operations. We provide basic AtoN training with specific Sealite product application and technology training, to ensure that you are competent in all facets of AtoNs and their use in marine safety.

Sealite is an Industrial member of the International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) and uses IALA recommended guidelines in all AtoN training conducted.

No prior knowledge is required to undertake this training.

Aim

This training will enable participants to explore and gain further understanding of marine navigation aids and their role in the safety of seafarers worldwide, through a series of theory and technical based hands-on training.

Training Units

- Unit 1: AtoN Basics
- Unit 2: Power Supplies
- Unit 3: Marine Lanterns
- Unit 4: Monitoring & Control
- Unit 5: Marine Buoys & Mooring
- Unit 6: Port Entry Systems

Learning Outcomes

At the conclusion of each unit of this training, the student will be able to:

- Understand the basics of aids to navigation
- Select appropriate navigation aid equipment for their location
- Set up of navaid equipment
- Install navaids at different locations
- Service & maintain navaids in the field

Assessment

Each unit will have both a theory and hands-on competency assessment to ensure students are trained to be able to service Sealite navigation aids in the field.
